Forging a global corporate with leading integration services

In 1990, Mr. Yuan-Jan Chang founded Topco Scientific with the philosophy of "diligence, professionalism, and sharing the success" to enter the advanced technology field. Under the leadership of Dr. J.W. Kuo, the current Chairperson, Topco has been actively introducing the latest manufacturing processes and technologies to provide customers with the highest standard of integrated services through achieving excellent strategic planning and efficient execution with the global logistics management capability.

In the field of advanced technology, Topco pursues reliable quality, punctual delivery, and responsive service to meet customer needs. In addition to providing precision materials, manufacturing equipment, and components for the semiconductor, LCD, and LED industries, Topco also offers system planning and integration services. Not stopped by its stock IPO in 2003, Topco has continued to explore more business, expand the scope of operations, and march into the global market; and Topco has reached its business into the environmental protection and green technology industries, such as plant wastewater treatment, clean room, and solar power plant projects. To complement the expansion, Topco built a complete supply chain and service network by providing integrated services from design, construction, operation, and maintenance. The continuing growth of annual revenue and profitability has proven that Topco's professional integration capabilities have been well received and recognized by customers from all over the world.

With a solid foundation, Topco extends its reach to build a comprehensive health business with technological thinking to incorporate health products and services and extend to the general health fields of food technology and health welfare. To achieve this, Topco founded ANYO Fresh, a healthy food supermarket, to offer customers select safe, fresh, and convenient healthy ingredients; and Topco also established ANYO Biotechnology, a provider of high-quality fishery products with track records as well as food processing and deep-freezing services with semiconductor-level cleanness and precision, in Mituo, Kaohsiung. In Su'ao, Yilan, Topco built ANYO Museum, a tourism factory with a top-grade green building that offers both delicacies and recreation. In addition, Topco is fostering the ANYO Fresh, an A-class amateur baseball team, establishing a sports center, and making a professional sports training product brand named "XSPORTS". With these efforts, Topco is aiming to promote a new way of health by promoting sports events and fitness activities.

From advanced technology, environmental protection, and green energy to the general health industry, Topco has grown from a single tree to an enormous forest. Today, it's still actively and proactively creating business prosperity and realizing its corporate vision to become a global corporate. Looking ahead, Topco will continue to observe the "Excellence via Perfection" motto to fulfill its social responsibility, contribute to environmental sustainability, and ultimately make the world a better place.
